DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 4/7/04 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 2 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Yamada et al. ("Yamada") (JP 11-54759).

Yamada discloses in figs. 1-8 an insulated gate type semiconductor device comprised of a semiconductor layer 3 serving as an active region isolated from a semiconductor substrate 1 by a substrate isolation insulating film 2, wherein a thickness of a first insulating film 4' formed as a buried insulating film (as in claim 3) provided on a surface of a first conductivity type semiconductor region positioned at an interface between that first conductivity type body contact region 8 for draining carriers stored at a channel region under a gate, and a second conductivity type source 6 and drain 6 regions is made greater than the thickness of a second insulating film 4,

acting as a gate insulating film, with a uniform thickness directly under a gate electrode 5, said gate electrode being provided on the region except for said body contact region.

Allowable Subject Matter

4. Claims 1, 5 and 9 are allowed.
